

CluckTalk App

14 days, 12+ Devices App Closed Testing Report

Application Name: "CluckTalk"

Project Name: App 14-Day Close Testing

Testing Duration: 14 days Testing continuously.

Testing Devices: 12+ Devices

Manufacturer: Suchana Roy

Operating System: Android

Google App Store Link:

<https://play.google.com/store/apps/details?id=com.Mooanalytica.CluckTalk>

Testing Objective

The primary objective of this 14-day close testing was to evaluate the functionality and usability of the "CluckTalk" app across 12+ different devices. The aim was to ensure the effectiveness of all features, system compatibility, and user experience (UX), which has been successfully achieved.

Testing Methodology

- ✓ 12+ Active Testers
- ✓ Real Testers
- ✓ Real Devices

- ✓ 5-Star Rating & Reviews
- ✓ Testing by Professional Team
- ✓ 14 Days Regular Testing

Testing Approach

After conducting testing, we observed the following:

Testing Participants:

We tested the app on **12+ devices** to verify whether all functions work correctly. Tester feedback was collected in the **feedback section**, and most testers **enjoyed using the app and praised it**.

Testing Methodology:

During the testing process, we evaluated the following aspects:

Feature Testing: Examined the functionality of different app features.

User Interface (UI): Assessed usability, design, and user-friendliness.

Performance Testing: Analyzed app loading speed, response time, and stability.

Bug Testing: Identified all possible bugs or crash-related issues.

Testing Results:

User Interface (UI):

- ☑ The interface is **clean and easy to use**.
- ☑ The design looks **visually appealing**, and testers enjoyed using the app's features.
- ☑ We believe that after completing the testing phase, the app will **gain a good reputation** once it goes live.

App Performance Testing:

- ☑ The app runs **smoothly on most devices**.
- ☑ **Battery consumption** is **moderate** and not excessive.
- ☑ The app is **mobile-friendly** across all tested devices.

Bug Identification:

Most features work correctly, but **some minor issues were found**, as listed below:

- ✗ Some **sound effects do not work consistently**.
- ✗ After playing a sound and navigating back, the **sound system stops working**.
- ✗ The **Play button icon does not change** when pressed.
- ✗ **Dark Mode in App Settings does not function** properly.
- ✗ **The app crashed on one device during testing.**(Crash Device: Samsung J4)

Recommended Improvements:

The app is **almost perfect**, but we have a few recommendations:

- ☑ Improve the **design with better colors and UI enhancements**.
- ☑ The **app icon should be more professional**.
- ☑ **Fix bugs and resolve programming issues**.
- ☑ Add a **confirmation prompt** when a user **presses the back button** to exit the app.
- ☑ Add **two additional buttons**: "Share Us" button "Rate Us" button

☑ Verify that the **Privacy Policy** page aligns with the **Data Safety and Security** section on the **app store**.

Conclusion:

The **14-day closed testing process** was successfully completed. We have provided important insights regarding the app's **functionality and user experience**. Addressing the identified issues before the production release will help improve the app's overall quality.

Thank you for allowing us to conduct this testing.

How To Apply for Production?

After testing your app for 14 days, the 'Apply For Production' button will be activated.

After 14 days are completed, you will be able to see something like this."

After clicking the 'Apply For Production' button, Google will ask you some questions. Provide the correct answers to those questions. Once you've answered, submit the form. After submission, Google will review your app, and once the review is complete, your app will go live and you will get a message like this:

Congratulations! Your app has been granted Google Play production access

You applied for Google Play production access for your app, and this has now been granted. Production is where you make your app available to billions of users on Google Play. You can now also use open testing. [Learn more about testing](#)

When you submit your app for production, Google will ask you the following questions.

*** How did you recruit users for your closed test?**

Answer: Answer: I selected testers from our internal team, friends, and targeted users. Additionally, I conducted the testing by inviting interested users through social media, online communities, and professional networks.

*** How easy was it to recruit testers for your app?**

Answer: Collecting testers was relatively easy because we had already built a community that was interested in our app.

*** Did testers utilize all of the features in your app?**

Answer: Yes, the testers have explored most of the key features of our app. We provided them with specific testing tasks to evaluate various functionalities, such as navigation, feature integration, performance, and user experience.

*** Provide a summary of the feedback that you received from testers?**

Answer: Most testers have praised our app's design, user interface, and feature set.

Additionally, my testers provided feedback through the feedback section of my app.

*** Who is the intended audience of your app?**

Please write answer according to your app [Who is your app designed for? Please mention the target audience for whom you created this app.](#)

*** Describe how your app provides value to users?**

[How will your app benefit users and why should they use it? Write all of this here.](#)

*** How many installs do you expect your app to have in your first year?**

[10k 40K 100K Choose whatever you like.](#)

*** What changes did you make to your app based on what you learned during your closed test?**

Answer: I didn't encounter any major issues, but there were a few minor problems which have been resolved.

"If you have any difficulties understanding, please let me know. I will try my best to assist you."

"Please don't forget to let us know how you found our service."

Thank you.
